

WATerview TUNNEL INFRINGEMENT DATA

Police operates four safe speed cameras, one at each entrance and exit to the Waterview tunnel. These cameras went live on 21 July 2017, following an extensive calibration and testing process.

The following infringement data covers the first month and half of the cameras' operation (deployments starting 21/07/2017 - 31/08/2017).

Police do not retain any of the fines associated with drivers exceeding the safe posted speed limit. All of this goes to the Government's consolidated fund.

The total number of speeding infringements issued by Police's safe speed cameras.

From 21 July 2017 – 31 August 2017, Police safe speed cameras at Waterview Tunnel issued 9,756 infringement notices for excessive speed, from a total of 1,520,767 vehicle trips detected by Police safe speed cameras through the tunnel.

The total value of speed infringements.

The total infringement fee value of the notices generated by the safe speed cameras operating at Waterview Tunnel was \$948,220.00

The infringement fee value relates to the set fee recorded on the notice and does not necessarily indicate the amount paid.

The above data is drawn from a dynamic police database and is subject to change.

Did you know...

Safety speed cameras on average reduce fatal and serious injury crashes by about 20% within the sphere of influence of the camera (up to about 1 km).
